

1986

The ultimate motorcoach

Marquis

A NEW ERA IN MOTORCOACHES.

New Concepts! New Products! Indeed, a new era in engineering and design, Marquis leads the way with America's most unique Motorcoach! Marquis is in a class by itself. . . . beyond "Class A".

*Optional Hi-Tech Dash.

DESIGNER INTERIORS THAT FEATURE VELOUR

Nothing matches the warmth, softness and comfort of velour. Your choice of three groups, (Charcoal, Slate Blue and Honey), color coordinated throughout, in patterns and solids — matching Bigelow Carpets, of course.

THE ULTIMATE

20 YEARS OF FINE MOTORHOME DEVELOPMENT.

Marquis... a motorcoach for the '90s—under development since 1976! The flagship of Beaver Motorhomes, using the knowledge and creativity gained from building America's finest recreational vehicles for over 20 years!

TRADITIONAL FABRICS

The timeless beauty, durability and quality of traditional color-coordinated European Tapestries, available in your choice of Regal Rose or Renaissance Blue.

Bigelow Carpets enhance your personal coach.

MOTORCOACH

Marquis... today's motorcoach. A perfect blend of state-of-the-art motorhome design and advanced Gilling coach chassis engineering. The ride and performance of a true touring coach, plus the livability and comfort of the Beaver Motorhome combine to make the Marquis unique.

CONSTRUCTION

Marquis proves beauty is more than skin deep. Attention to detail throughout, featuring highest quality construction that you can only see on a factory tour. Marquis features exclusive "Cor-lock" marine grade laminated fiberglass wall and roof panels that are the strongest and the lightest in the industry. Originally developed for large yachts, our "Cor-lock" process secures end-grain balsa between a sandwich of hand-laid fiberglass, forming a strong uniform panel that will last a lifetime. No wavy or washboard walls on a Marquis, they'll stay flat and smooth forever.

WALLS AND ROOF

Under the full "Cor-lock" fiberglass panels is a completely laminated wall and ceiling system. Using 1½" construction grade foam, the walls are completely laminated to the interior wall covering and an exterior Iuan mahogany plywood. This laminating process bonds all components into a single, strong panel with an insulation factor of R-13 or better.

FLOOR

Using the same laminating process as above, the floor also has a fiberglass exterior layer laminated to the lower underside for additional weather protection. Fiberglass wheel wells are also standard... no rust problems, ever!

FRAME

The Marquis frame is aluminum—but not the usual kind. Space age #T-6 high yield aluminum features a strength-to-weight ratio that was unheard of a few years ago. The 1½" square tubing used in the floor, sidewalls, roof and framework of the Marquis is rated at 35,000 pounds per square

inch (PSI). Incredible... And because aluminum alloys are so much lighter than steel, we use a lot more of it... an extra margin of safety for you.

ELECTRICAL

Today's modern Hi-tech Marquis motorcoach has been developed into a complex electronic machine, with a truly sophisticated and fully engineered electrical system being produced in our own plant. Wired according to plan, color coded, and installed the same way, every day. Every Marquis owner receives a complete wiring schematic of the entire electrical system. Marquis uses a 50 amp to 70 amp system, wired to residential standards. The chassis is loom wired and plug-connected to all other major components.

PLUMBING

The Marquis freeze-resistant plumbing system features dependable polypropylene lines with brass fittings, large capacity water and holding tanks of 100 gallons or more! Residential sinks, showers, and tubs give you home comfort and convenience. In addition, the combination propane/110 electric water heater doubles your choices... a Marquis exclusive!

CABINETS

Premium oak furniture would be a better description. Old-world craftsmanship coupled with the finest materials and newest woodworking technology make Marquis cabinets unique! Features such as dovetailing, mortise and tenon joints, screw-joint face frames, and hand rubbed oil finishing are standard. Cabinets that are the envy of the industry, and built for a lifetime.

COMPONENTS

We build quality motorcoaches and motorhomes. We do not import components and parts from around the country and try to make them fit. We build all of our own components from our own blueprints and put it all together under our own roof. Fiberglass, laminating, cabinet work, welding, electrical harnesses, draperies, painting, it's all done in our own factory, and is done to our own strict quality standards.

THE CHASSIS

Marquis uses the latest in coach chassis technology... the Gilling bus chassis. Specially designed for today's touring coach, each Gilling chassis features an air-ride suspension, tuned to each individual Marquis floor plan. The 'Nu-Way' air suspension is like riding on a cloud.

THE ULTIMATE

The chassis features heavy duty bus components, time proven in the transit bus industry. Axles, steering, brakes, frame, and suspension... all heavy-duty enough to more than handle the load with ease.

You have a choice of engines for your new Marquis. Pick your power: A Detroit 8.2 liter or Caterpillar 3208 diesel, both turbo-charged, and coupled with heavy duty 4-Speed Allison automatic transmission. Other features include Bennett electrical shifters, air throttles, air brakes (some models), aluminum alloy wheels, Michelin 22.5 radial tires and more... all standard on Marquis! Fuel capacities are from 100 to 150 gallons, depending on your power selection. Marquis also features large side-mounted radiators and alternators from 105 to 160 amp capacity.

Gilling manufactures each chassis to individually fit the floor plan and engine configuration. We recommend that you confirm your components with your dealer or with the factory at time of order.

WIDE BODY PLANS

Marquis makes today's floorplans in standard 96" width or the new, optional 102" width. 6 inches of subtle difference adds to the liveability of the Marquis floorplans. Not for everyone, the extra-wide coach might be right for you. Write the factory or see your dealer for a brochure explaining the wide-body concept.

FLOORPLANS

Marquis is the flagship product of Beaver Motorhomes of Bend, Oregon... The leader in floorplan development, engineering and design for over 20 years. The unique and complete use of space as well as the total comfort designed into your Marquis is the result of Beaver's 'cutting edge' as a leader in the industry. Beaver designers are working with a custom frame configuration and no front engine compartment. The possibilities are almost limitless... and in Marquis, you get them all!

FACTORY TOURS

See for yourself what we mean when we say the quality is 'built-in'. Visit our factory in Bend, Oregon for a complete tour of our facilities. Seeing is believing and we want you to see. Tours are Monday through Friday 8 am to 5 pm.
